

How It Works...

The Wharfedale Diamond Active speakers and Diamond H1 Hub work wirelessly, completely independently of each other, with no interconnects.

The units communicate between each other on the 5.8GHz frequency band for high quality, lossless playback.

Change source / volume control and menu parameters with the included remote, or use the touch panel on the Diamond H1 Hub itself.

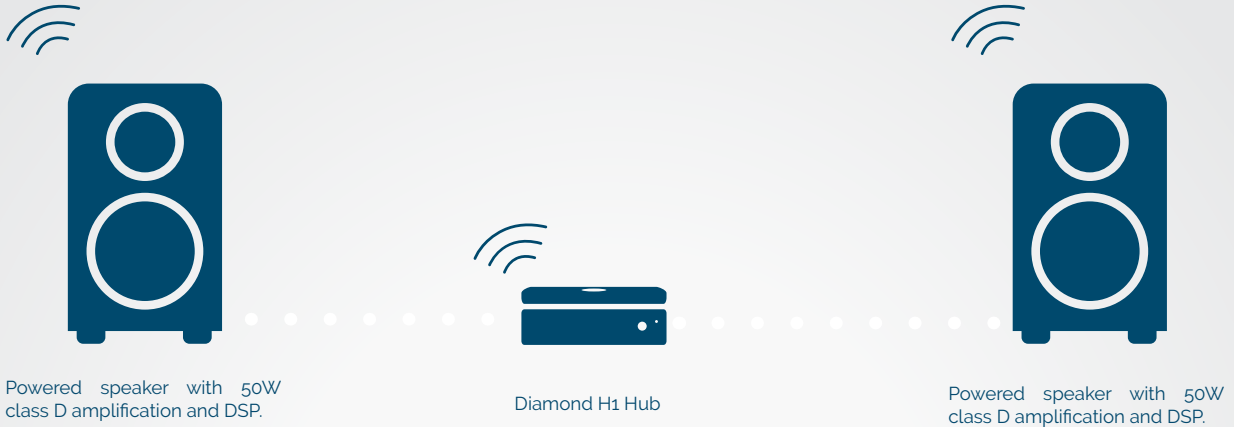

Connect any Bluetooth device and enjoy wireless playback with the aptX codec for CD-like sound quality.
